The Illinois County Coal Map Series was published in 1986 and is intended to provide a general overview of the coal resources of Illinois. The maps depict the location and depth of coal deposits, as well as other geological features that may affect the mining of coal. The maps are not intended to be used for detailed mining operations or to provide information on the quality of the coal deposits.

The information on the Illinois County Coal Map Series is based on the best available data at the time of publication. The information is subject to change as new data becomes available. The ISGS encourages users to consult the latest data and information sources for the most up-to-date information on the coal resources of Illinois.
