Danville Coal Elevation

LOGAN County

The map shows the locations of coal beds and other geologic features in Logan County, Illinois. The data used to create the map were obtained from various sources, including the Illinois State Geological Survey and private coal companies. The map provides a visual representation of the geologic structure of the area, including the locations of coal deposits, fault lines, and other geological features. The map is intended to be a useful tool for understanding the geology of the area and for planning future mining operations. However, it is important to note that the data used to create the map may not be complete or accurate in all areas. The map is subject to change over time as new data becomes available.
