Danville Coal Sulfur
ST. CLAIR County

Map Explanation
The map was digitized from hardcopy County Coal Maps. The original maps were produced by the Illinois State Geological Survey. The scale range is 1:24,000 to 1:96,000. The maps were created by the County Map Series project of the Illinois State Geological Survey. The map shows the distribution of coal deposits and mining areas within the county. The map includes the names of towns, roads, and other geographical features.

Disclaimer
The Illinois State Geological Survey and the University of Illinois make no guarantee, either express or implied, for data included in the maps. The data are intended for general use and have not been formally adopted by the ISGS. The maps are available for use at a scale of 1:100,000. No part of these maps may be reproduced without the permission of the ISGS.
