Notes: Rocks present only in subsurface. Local oil-field names have been developed by the operators of these fields. The data set was created for the purpose of developing an oil industry atlas, and the oil-field names have not been formally adopted by the Illinois State Geological Survey (ISGS), which maintains a definitive set of rock names.

The data set was created for the purpose of developing an oil industry atlas, and the oil-field names have not been formally adopted by the ISGS. Consequently, the accuracy of the interpreted features shown in these files is subject to the limitations of the data and varies from place to place.
