The Springfield Coal Thickness map represents the thickness of coal deposits in Franklin County, Illinois. The map illustrates the distribution of coal layers, with various shades indicating the thickness of the coal seams. The data included in this map are suitable for use at a scale of 1:100,000.

The map was compiled from data from a variety of public and private sources and has varying degrees of completeness and accuracy. However, these interpretations are based on data that may vary with respect to accuracy and reliability, as they were supplied to the Illinois State Geological Survey.

The maps and digital files of this study were compiled from data from a variety of public and private sources and have not been adopted formally yet by the ISGS and are subject to change. The data set and accept no liability for the consequences of decisions made by others on the use of this data set.
