

A Look at the History of the ISGS Publication Record

Anne Huber

Illinois State Geological Survey
Prairie Research Institute
University of Illinois Urbana-Champaign

About the speaker: Anne Huber is the Geologic Information Curator at the Illinois State Geological Survey. She joined the organization in 2006. Anne received a Master of Library Science from Indiana University-Purdue University Indianapolis, Master of Science in Environmental Science from Indiana University, and a Bachelor of Arts in chemistry from Kalamazoo College.

Researchers at the Illinois State Geological Survey have been writing and publishing since the establishment of the organization in 1906. Publishing venues include the in-house publication series, as well as journal articles, conference presentations, books, and book chapters. And there are many catalogs and indexes that describe and track this record. You may ask, how is information about ISGS research disseminated, how are we keeping track of it all, and how can this help me?

I will discuss the databases and tools that are used to manage and archive the ISGS publication record and how these tools can help you in your research. Topics for discussion include the IDEALS repository, staff bibliography in a Zotero database, and the Illinois Experts database.

Additional Information:

1) ISGS in IDEALS repository:

<https://www.ideals.illinois.edu/handle/2142/16943>

2) ISGS staff bibliography:

https://www.zotero.org/groups/illinois_state_geological_survey_staff_bibliography

3) ISGS in Illinois Experts database:
