Herrin Coal Depth
MONROE County

**Map Explanation**

The Herrin Coal Depth map represents the depth of coal deposits in the Monroe County, Illinois. The map is useful for understanding the thickness and depth of coal layers, which is crucial for land-use planning, mining operations, and environmental considerations. The map highlights different depth categories with various colors, providing a visual representation of the coal bed's structure.

**Disclaimer**

The Herrin Coal Depth map is an indicative representation and should be used for general knowledge. For specific and precise information, consult geological surveys and reports. The map is subject to change due to ongoing geological studies and mining activities. Always verify the most recent data for accurate and up-to-date information.
